February 26, 2010

Dear Bill,

First of all I would like to thank you for your visit to our humble school. Your presence was sure a morale booster for all of us here. Just knowing that you might be able to help is a good thing for us. Thank you for your time and expertise.

As per our meeting with the Board and myself, we would like to request, if all possible, that a team of graduate students come, to our school. We would like them to do the following tasks.

- To assess the buildings and see if there are any major structural issues.
- To look at ways the building can be made safer for the students, and those that work here.
- To help us look at making the building more energy efficient.
- To look at ways of updating the school buildings in heating, electrical, and plumbing issues.
- To look at the school options of using solar or wind to supply our energy needs.

If you are able to get a team of students, then we would offer them a place to stay with a kitchen. Also, we would provide tours of the area. As you know our area is rich with historical and geological treasures. Locally, we would take the students to Acoma and Laguna Pueblos and visit the historical places. There is also the Northwest Visitor Center that has excellent information of the geological formations of the area or they can go to Chaco Canyon where there is an ancient pueblo site. They can even come for a glass of wine at our local vineyards.

I know that we are in the planning stages, but we will work with you to create a plan to have some of your graduate students come out for this project to look at our buildings. Please give me a call for any questions or concerns. Also, check out our web page for any more information at [stjosephmissionschool.com](http://stjosephmissionschool.com).

Thank you, for your time and consideration.

Peace,
